PREFACE

This study has been done annually since 1976 to provide the Congress and the public with the status of ongoing major federal acquisitions. The report includes acquisitions financed solely with federal funds and those financed jointly with federal, state, and other funds. It provides data on cost, schedule, quantity, and funding as well as reasons for cost growth.

Information in this report was supplied by the departments and agencies involved. The data for some acquisitions is incomplete because agencies did not have it readily available or because it was classified. We did not validate the data for accuracy; however, the data received was reviewed, discussed with agency officials, and then computerized. A copy of the computerized data was then sent to the agencies for review to ensure it represented official agency records. After corrections were made, the data was summarized and the results are presented in this report.

We did not obtain official comments on this report because it primarily provides status information on major acquisitions as provided by the agencies concerned.

We are sending copies of this report to the Director, Office of Management and Budget; secretaries of various departments and heads of independent agencies involved; chairmen and ranking minority members of congressional committees; and individual congressmen.

SUMMARY OF THE
STATUS OF MAJOR FEDERAL ACQUISITIONS
AS OF SEPTEMBER 30, 1982

As of September 30, 1982, 35 agencies estimated it would cost \$842 billion for 444 major acquisitions. This represented cost growth of over \$400 billion when measured against both the initial and development estimates.

OBJECTIVES, SCOPE, AND METHODOLOGY

The objective of this report is to provide the Congress and the public with information on the status of major civil and defense acquisitions as of September 30, 1982. The report provides data on cost, schedule, quantity, and funding as well as reasons for cost growth. Information in this report was supplied by the departments and agencies involved in acquiring major acquisitions as identified from budget requests and our review of federal acquisitions. The data for some acquisitions is incomplete because agencies did not have it readily available or because it was classified. We did not validate the data for accuracy; however, the data received was reviewed, discussed with agency officials, and then computerized. A copy of the computerized data was then sent to the agencies for review to ensure it represented official agency records. After corrections were made, the data was summarized and the results are presented in this report.

This report does not compare cost increases between agencies because overall comparisons could be misleading for many reasons, including different complexities of projects, varying periods involved, different methods of handling inflation, and a variety of means of establishing cost estimates.

For the purpose of this report, civil works acquisitions of the Corps of Engineers are treated as civil acquisitions and are shown under the Corps of Engineers agency heading.

Cost growth is measured from two major points in the acquisition cycle--the initial and the development estimate. The initial estimate is the estimate contained in the budget justification on which the Congress bases its original funding of an acquisition. We have consistently taken the position that measuring cost growth from the initial estimate provides the Congress and top agency management with historic indicators on cost growth that may be expected when approving acquisitions as well as data necessary to effectively carry out oversight and fiscal responsibilities. The development estimate is a more refined estimate generally made a few years later when the

acquisition is better defined. The Department of Defense and some civil agencies believe that measuring from the development estimate only is a fairer measure of cost growth as well as the ability of an agency to develop realistic cost estimates and generally manage acquisitions. This report provides cost growth variances from both the initial and development estimates through September 30, 1982.

Agencies were requested to provide cost, schedule, and quantity data on acquisitions for federal ownership and use which met the following criteria:

- The Department of Defense weapon system acquisitions with total estimated research, development, test and evaluation costs exceeding \$75 million and/or an estimated production cost exceeding \$300 million.
- Civil and the Department of Defense acquisitions other than weapon systems (i.e., military construction and telecommunications) with a total estimated cost exceeding \$50 million.

The \$50 million criteria is in keeping with legislation introduced in 1982 and again in 1983 requiring status reporting on civil acquisitions. The criteria for weapon systems was at one time in agreement with the Department of Defense's Selected Acquisition Reports to the Congress. The selected acquisition reporting criteria has been increased to estimated costs of more than \$200 million for research, development, tests and evaluation and/or \$1 billion for production. As of September 30, 1982, the Department of Defense reported, via unclassified Selected Acquisition Reports, 47 weapon systems estimated to cost over \$457 billion whereas our report, due to the lower cost criteria, covers an additional 97 weapon systems estimated to cost nearly \$280 billion. We believe this broader coverage is necessary to assist the Congress in carrying out its oversight and fiscal responsibilities.

Agencies were also requested to provide the reasons for cost growth in excess of 25 percent of the initial estimate and the reasons for cost growth in excess of 25 percent that occurred during fiscal year 1982, that is, from the ending fiscal year 1981 estimate to the ending fiscal year 1982 estimate. The 25-percent thresholds are in keeping with recently enacted legislation on the Department of Defense's Selected Acquisition Reports and proposed legislation on civil acquisition status reporting. In both cases, the legislation requires that expenditures cease for major acquisitions incurring cost growth in

excess of 25 percent, unless the heads of departments or agencies make a certification to the Congress covering specified concerns. For civil acquisitions, this refers to cost growth over initial estimates and for defense weapon systems over unit cost estimates shown on specified Selected Acquisition Reports.

OVERALL STATUS OF ACQUISITIONS

The total estimated cost of the 444 ongoing acquisitions as of September 30, 1982, included cost growth of \$401 billion from the development estimates and \$463 billion from the initial estimates. Appendix I provides a summary by agency of the total major acquisition programs and related cost growth. Appendix II provides an overview of the cost (including growth), schedule, quantity, and funding status by individual acquisition. Appendix III identifies program changes and cost growth occurring during fiscal year 1982.

The Department of Defense acquisitions have a total estimated cost of nearly \$742 billion, about 88 percent of the total of both civil and defense acquisitions. This includes cost growth of about \$364 billion from the development estimates and \$415 billion from the initial estimates. The major reasons provided for the cost growth were quantity increases in weapon system acquisitions and inflation. (See app. IV.)

The civil acquisitions have a total estimated cost of just over \$100 billion. This includes cost growth of about \$36 billion from the development estimates and \$48 billion from the initial estimates. Inflation was the major reason given for civil acquisition cost growth. (See app. IV.)

The following schedule shows the reasons provided by the agencies for cost growth in excess of 25 percent of the initial estimate for both civil and defense acquisitions. This encompasses cost growth from the development estimates.

Summary of Reasons
for Cost Growth

<u>Reason a/</u>	<u>Amount</u>	<u>Percent of total amount</u>
	(millions)	
Quantity changes	\$ 55,438	29
Inflation	49,789	27
Estimating changes	23,287	13
Support changes	17,033	9
Engineering changes	16,040	8
Schedule changes	12,179	7
Design changes	3,205	2
Other	<u>9,778</u>	<u>5</u>
Total	<u>\$186,749</u>	<u>100</u>

a/The reasons are defined on page 60 of Appendix IV.

In addition to cost growth, we identified the following variances from initial estimates:

--182 acquisitions had completion date slippages exceeding

1 year (see app. V),

--75 acquisitions had quantity variances exceeding 25 percent (see app. VI), and

--157 acquisitions had unit cost increases exceeding 25 percent. (See app. VI.)

These variances were measured from initial estimate planning data to the current data as of September 30, 1982, and therefore, cover the development estimate data. These variances may not result in a net increase in the cost of an acquisition. For example, an increase in an acquisition's unit cost may be netted by a decrease in the number of units acquired.

We did not attempt to evaluate the underlying causes for these variances; therefore, they are provided for information only and are not necessarily an indicator of mismanagement but may be the result of prudent management by the agencies involved. For example, a slippage in the completion date could be necessitated by a management decision to take advantage of a technological breakthrough resulting in the acquisition of a more effective and efficient product.

Details on the funding status of acquisitions are shown in Appendix VII and acquisitions are shown by location in Appendix VIII. Our major reports concerning cost growth and status reporting are included in Appendix IX.

APPENDIX II

ACQUISITION STATUS SUMMARY

AS OF SEPTEMBER 30, 1982

This is a summary schedule of the status of each acquisition as of September 30, 1982. The acquisitions are listed by department and major agency and by sub-agency or major budget program, if known.

EXPLANATORY NOTES

- (1) PROJECT NAME
ID#/CAT/LOC/QUANTITY:

The first line is a short title of the acquisition. The second line contains--

ID#--GAO assigned identification number to be used when making inquiries about the acquisition.

CAT--Abbreviated acquisition categories which are defined as follows:

1. WP/DAM--Water projects involving the construction of dams.
2. WP/OTH--Other water projects such as the prevention of beach erosion and the clearing of channels for navigation.
3. EQP--Procurement of equipment such as radars, vehicles, vessels, aircraft, and so forth.
4. ADP/TELECO--Automatic data processing and telecommunications systems.
5. WPN/SARS--Defense weapon systems included in the Selected Acquisition Reporting system.
6. WPN/OTH--Defense weapon systems not included in the Selected Acquisition Reporting system.
7. R&D--Acquisitions with the primary objective of promoting research and development such as the electric car battery.
8. CON/HGwy--Construction of highways.
9. CON/FR--Construction of fission reactor facilities and related equipment.
10. CON/S--Construction of special purpose program facilities such as solar energy demonstration facilities.

APPENDIX II

APPENDIX II

11. CON/GEN--Construction of federal office buildings, hospitals, air fields, and so forth.
12. OTHER--Acquisitions that do not fit in the other categories.

LOC--Location of the acquisition by state postal abbreviation, by US if more than one state, or by FN if in a foreign country.

Postal abbreviations

Alabama-AL	Nebraska-NE
Alaska-AK	Nevada-NV
Arizona-AZ	New Hampshire-NH
Arkansas-AR	New Jersey-NJ
California-CA	New Mexico-NM
Colorado-CO	New York-NY
Connecticut-CT	North Carolina-NC
Delaware-DE	North Dakota-ND
District of Columbia-DC	Ohio-OH
Florida-FL	Oklahoma-OK
Georgia-GA	Oregon-OR
Hawaii-HI	Pennsylvania-PA
Idaho-ID	Rhode Island-RI
Illinois-IL	South Carolina-SC
Indiana-IN	South Dakota-SD

Massachusetts-MA	West Virginia-WV
Michigan-MI	Wisconsin-WI
Minnesota-MN	
Mississippi-MS	
Missouri-MO	
Montana-MT	Wyoming-WY

QUANTITY--Quantity being acquired, including applicable unit of measure.

APPENDIX II

APPENDIX II

(2) TOTAL ESTIMATED COST:

Cost estimates shown under this heading include the non-federal share for an acquisition financed jointly by federal, state, and other funds--

CURRENT ESTIMATE--total estimated cost as of September 30, 1982.

CHANGE FROM DEVELOPMENT--cost and percent change from the development to the current total estimated cost.

(3) FEDERAL SHARE OF ESTIMATE:

Cost estimates in this section include only the federal share--

CURRENT AMOUNT--estimated federal cost as of September 30, 1982.

CHANGE FROM INITIAL EST--cost and percent change from the initial to the current estimate of the federal share.

CHANGE DURING

FISCAL YR. 82--cost and percent change from the ending fiscal year 1981 estimate to the ending fiscal year 1982 estimate.

(4) UNIT COST:

The current unit cost in dollars obtained by dividing the planned quantity into the planned total estimated cost as of September 30, 1982, and the percent of unit cost growth from the initial to the current unit cost.

(5) QNTY % CHG:

The percent of change between the initially planned quantity and the planned quantity as of September 30, 1982.

(6) % OF FUNDG RCV'D:

The funds appropriated through fiscal year 1982 as a percent of the total estimated cost as of September 30, 1982.

APPENDIX II

APPENDIX II

(7) YRS SLIP:

The years slipped from the initially planned completion date to the currently planned completion date as of September 30, 1982.

APPENDIX III

APPENDIX III

PROGRAM CHANGES AND COST GROWTH
OCCURRING DURING FISCAL YEAR 1982

This appendix is divided into five different schedules as follows:

- Schedule I is a summary by agency of program changes, including deletions, additions, and cost variances.
- Schedule II is a summary by department and major agency of the cost growth during fiscal year 1982.
- Schedules III, IV, and V summarize the reasons given for cost growth by (1) department and major agency, (2) acquisition category, and (3) individual acquisition.

The definitions of the reasons for cost growth are shown on page 60 of Appendix IV.

APPENDIX IV**APPENDIX IV**

COST GROWTH INCURRED FROM
ORIGINAL CONGRESSIONAL FUNDING
ESTIMATE, THAT IS, INITIAL ESTIMATE

This appendix contains four different schedules. Schedule I shows cost growth from the initial and development estimates summarized by department and major agency. Schedules II, III, and IV show the causes for cost growth by (1) department and major agency, (2) acquisition category, and (3) individual acquisition. Schedules II, III, and IV do not crossfoot because the initial estimate column shows the total of all the cost growth in excess of 25 percent for some of which the agencies did not provide reasons and in some instances the amounts provided under reasons for cost growth were greater than the cost growth from the initial estimates.

The reasons for cost growth are categorized as follows.

- Quantity change - any increase or decrease in the current number of units being acquired and the planned number associated with the initial estimated costs. Units should be shown by the appropriate unit of measure, that is, square feet, each, kilowatts, beds, miles, and so forth.
- Inflation - any change due to the operation of the economy, including the difference between estimated and actual inflation.
- Estimating change - any change in cost due to an error or variance in assumptions used in preparing the initial cost estimate.
- Support change - any change in items necessary to support of the primary item(s) being acquired, that is, initial spares, repair parts, training, peculiar support equipment, data, and operational/site activation.
- Engineering change - any change in the physical or functional characteristics of the primary item(s) being acquired not including changes in support items.
- Schedule variance - any change in the completion date from the planned completion date associated with the initial estimated cost when the change is not necessitated by one of the other reasons such as construction delay.
- Design change - (Construction Projects Only) - any changes in the design of a construction project.
- Other - any change in costs for reasons not provided in the other cost categories.

APPENDIX VIII**APPENDIX VIII****MAJOR ACQUISITIONS BY LOCATION**

This appendix shows individual acquisitions by geographic locations and a summary of total acquisitions for each state. The agencies were asked to provide the state in which the acquisition was actually located or the primary state if more than one state was involved. If the acquisition involved the procurement of goods and services, the agencies were asked to provide the state in which the primary contractor was located. The postal service abbreviations are used to designate the states, with US designating acquisitions located in more than one state or for which a location was not provided and FN designating those located in a foreign country. Also, the state summary shows the federal and non-federal cost as well as the state's percentage of the total of all the ongoing acquisitions.

The postal service abbreviations are as follows:

Alabama - AL	Montana - MT
Alaska - AK	Nebraska - NB
Arizona - AZ	Nevada - NV
Arkansas - AR	New Hampshire - NH
California - CA	New Jersey - NJ
Colorado - CO	New Mexico - NM
Connecticut - CT	New York - NY
Delaware - DE	North Carolina - NC
District of Columbia - DC	North Dakota - ND
Florida - FL	Ohio - OH
Georgia - GA	Oklahoma - OK

MAJOR GAO REPORTS
CONCERNING COST GROWTH
AND STATUS REPORTING

This appendix gives general information on major GAO reports issued since 1972 on cost growth and status reporting. In addition to the report title, number, and date, a brief synopsis of findings regarding cost growth and status reporting is provided.

APPENDIX IX

APPENDIX IX

MAJOR GAO REPORTS CONCERNING
COST GROWTH AND STATUS REPORTING

**Feasibility for Constructing Price Indexes for Weapon Systems
(B-159896, 4/10/72):**

--The inability to accurately measure inflation makes it difficult to measure the effectiveness of government management in procuring weapon systems. The construction of price indexes could help to alleviate this problem.

Cost Growth in Major Weapon Systems (B-163058, 3/26/73):

--Cost growth incurred due to demand for greater system capability, inflation, and management procedures.

**Reporting of Selected Major Civil Projects Needs Improvement
(PSAD-77-5, 12/29/76):**

--The reporting of the status of major civil acquisitions should be given to the Congress for evaluating overall program progress and decisionmaking. The Office of Management and Budget should provide guidance and monitor implementation.

Improved Reporting Needed on National Aeronautics and Space Administration Projects (PSAD-77-54, 1/27/77):

--Reports should give status of funding and expenditures in relation to budget plans.

Consistent and Uniform Treatment of Inflation Needed in Program Cost Estimates Provided to the Congress (PSAD-78-8, 3/20/78):

--Agencies vary in methods of estimating and applying inflation indexes to program cost estimates. The Office of Management and Budget needs to establish uniform policies and procedures.

**Congress Needs More Reliable Cost Estimates and Established Priorities for Allocating Funds for Water Resource Projects
(PSAD-79-13, 1/29/79):**

--Cost estimates given to the Congress are incomplete and not always based on current prices, cost growth occurred due to planning delays, insufficient funding, and a court injunction due to an environmental suit.

APPENDIX IX

Impediments to Reducing the Cost of Weapon Systems (PSAD-80-6, 11/8/79):

--Funding instability resulted in increased costs which led to reduced quantities.

The National Aeronautics and Space Administration Should Provide the Congress Complete Cost Information on the Space Telescope Program (PSAD-80-15, 1/3/80):

--Excluded from life-cycle cost estimates were civil service salaries, studies and support cost, and inflation.

"SARs"--Defense Department Reports Should Provide More Information to the Congress (PSAD-80-37, 5/9/80):

--SARs should give better disclosure as to the status of acquisitions, should be shortened to facilitate use by people with little time, and present data that is complete, accurate, and not misleading.

Controlling Federal Costs for Coal Liquification Program Hinges on Management and Contracting Improvements (PSAD-81-19, 2/4/81):

--Cost growth was due to incomplete original scope and poor estimating and contract administration.

F/A-18 Naval Strike Fighter: Progress Has Been Made But Problems and Concerns Continue (MASAD-81-3, 2/18/81):

--Use of optimistic inflation rate, increases in quantity, and changes in scheduling and engineering contributed to cost growth.

Recommendations to Improve Defense Reporting on Weapon Systems (MASAD-81-7, 3/2/81):

--We recommend that changes be made to the SAR system to include the more important systems that are in advanced development, to better describe shortcomings and limitations of systems, to include a narrative section on technical risks, and others.

Improving the Weapon Systems Acquisition Process (MASAD-81-29, 5/15/81):

APPENDIX IX

APPENDIX IX

APPENDIX IX

--Schedule stretchouts and resulting higher costs could be avoided by eliminating some low priority programs.

Budgetary Pressures Created by the Army's Plans to Procure New Major Weapon Systems Are Just Beginning (MASAD-82-5, 10/20/81):

--Problems caused by use of lower than experienced inflation rates, schedule stretchout, increased spare parts requirements, and reduced contract quantities to cover cost increases.

Further Improvements Needed in the Department of Energy for Estimating and Reporting Project Costs (GAO/MASAD-82-37, 5/26/82):

--Errors in cost estimating were due to (1) a lack of sufficient guidelines, (2) insufficient project definition, and (3) unrealistic inflation rates.

Cost Information Presented to Congress on the C-5B Aircraft Program (GAO/MASAD-83-5, 12/30/82):

--The C-5B cost estimate of \$8.8 billion supporting the fiscal year 1983 budget was understated by \$700 million due to the omission of certain acquisition costs, for example, ground support equipment, simulators, and technical data.

The B-1 Bomber Program--A New Start (GAO/MASAD-83-21, 4/13/83):

--The B-1B program still omits known program costs, for example, independent cost estimates prepared by the Office of the Secretary of Defense and Air Force analysts agree on \$1.4 billion in additional acquisition costs not included in the estimate provided to the Congress.
